Implications – Story Behind The Data

What did the data tell us? - the past

HK Residents have shown clear changes in interests and behaviors

Data is leading the way in enabling marketers to shape messages and offerings in a timely fashion. Surges in time spent at home online have been a boom for entertainment and video apps, Netflix Marketing has certainly expanded to cover this need

The same uptick was seen in food delivery services and home shopping portals and personal banking. Benchmarking 'normal conditions' to measure 'positive' and 'negative' changes is key to understanding what is driving a particular market sector

This report was created to highlight the pre and post virus outbreak and its impact on user behavior

The look back window its of limited use in real world applications and the next logical step is to take a 'moving window' to monitor change and provide timely updates

What are the next steps? - the future

Recovery Indicator Monitoring & Timing
Data will signal when HK consumer and commercial confidence will return.

'Closely following changes in trends and recovery indicators will be crucial for marketers to react and reach out with impactful messaging.
Timing will be everything'

By tracking the basket indicators below it will be crucial guidance to business and hopeful indicators for residents of life 'returning to normal' after the virus

1. Retail Footfall
Premium Shopping Malls, local shopping malls, District level, POI

2. Entertainment
Location footfall, online subscriptions & consumption

3. Travel & Transport
Commuter Journeys, Autos Usage, Public transport (Airport, Ports of entry)

4. Consumer Interests changes
Foreign Currency Exchange / Travel Destination Content
Stay Home Activities (Video Game, Homemade food, Online Education)
New Car Content Consumption
New Property Content
Insurance Product Research
Financial Products (investment, stocks, bonds)
